Title: Math Language Skills for ELPAC

Last Modified: 04/15/25

Designer: Citlalli Villegas

Time: 20 minutes

Development Tool: H5P (Lumi)

Lesson #1

Identify Components from a Bar Chart

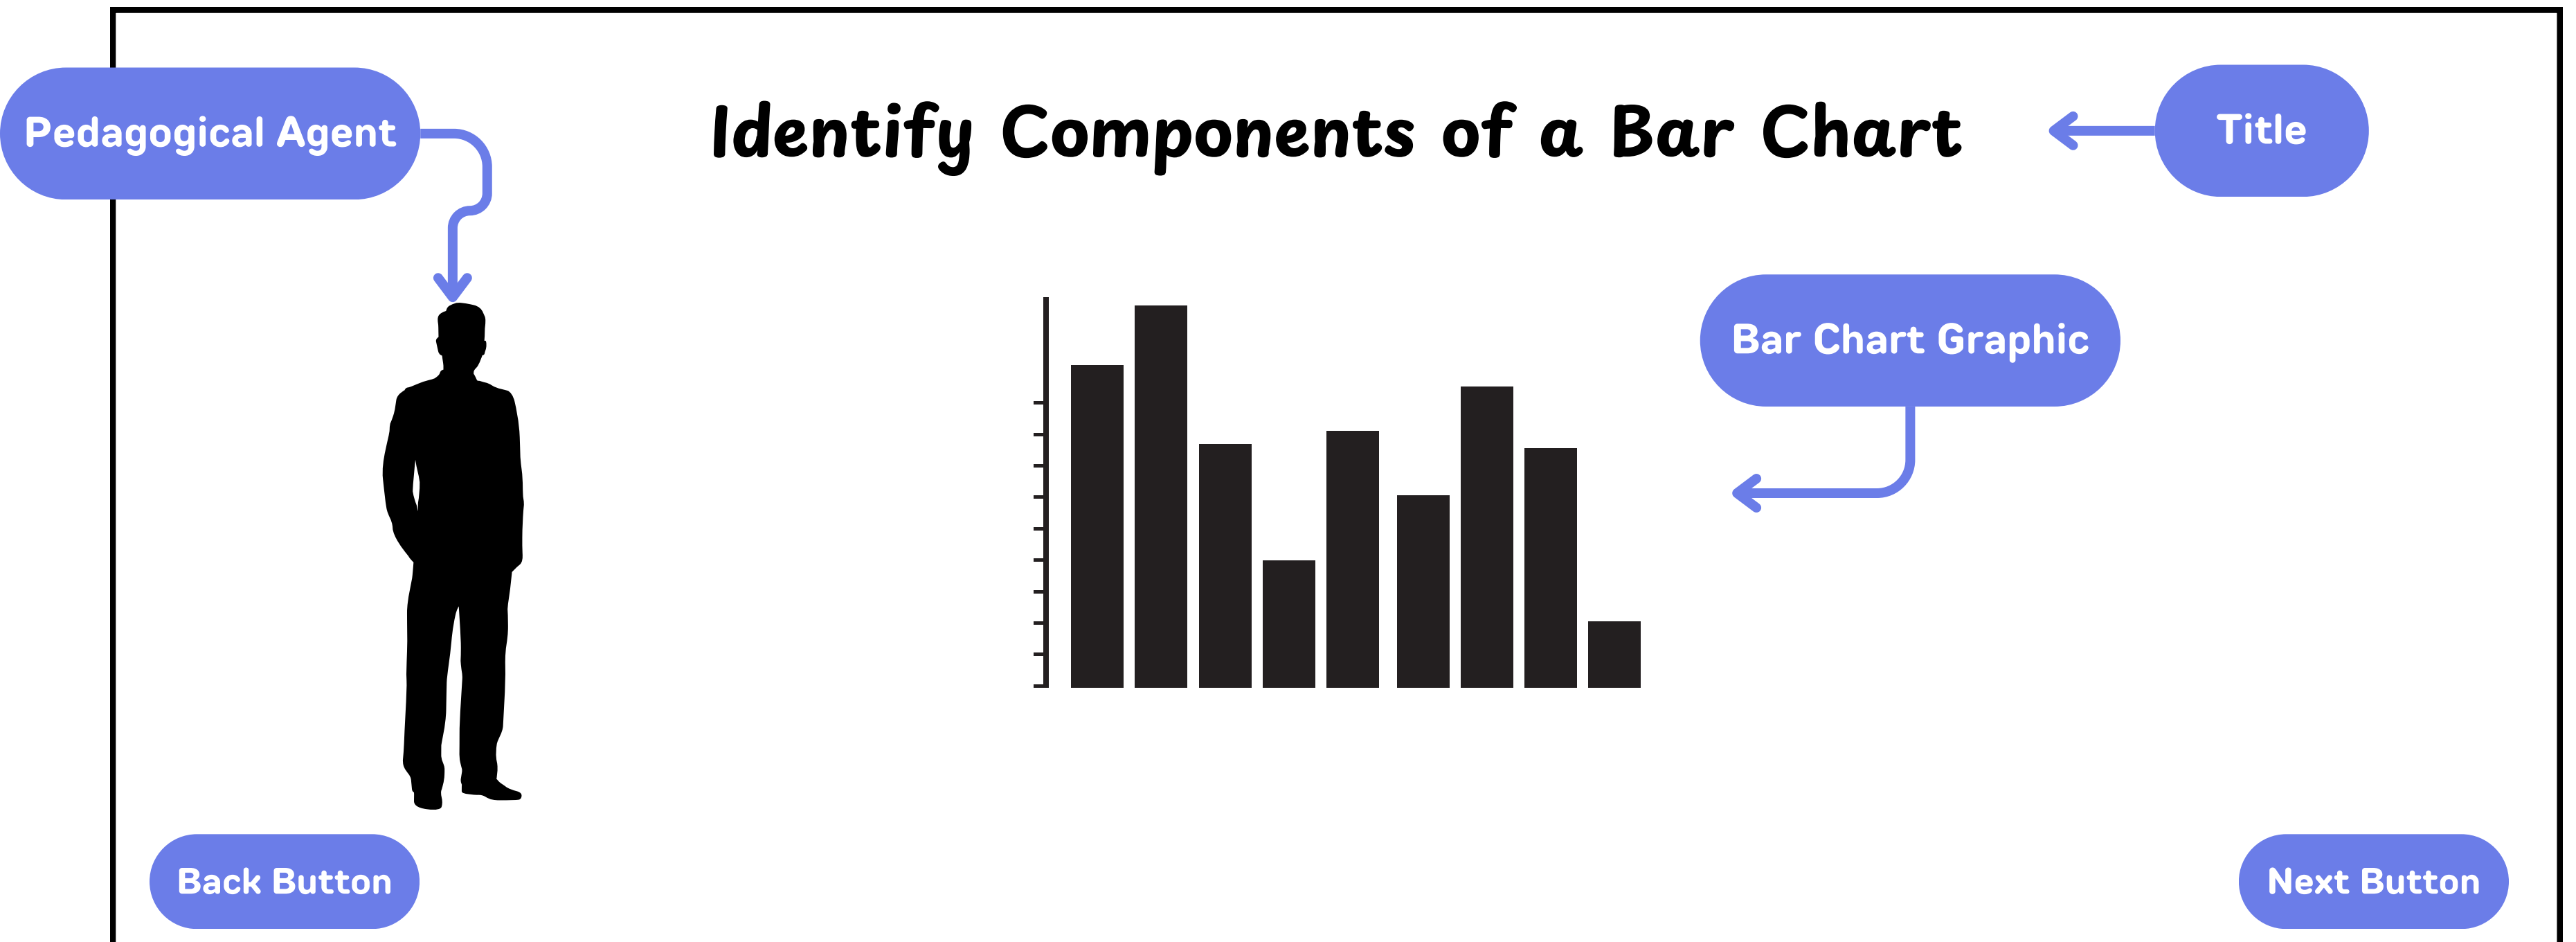

In this lesson, students will be able to identify and describe the key components of a bar graph, including the title, axes, bars, and labels. The lesson will utilize an interactive tool that allows students to engage with the material effectively. The lesson will be an H5P SCORM file embedded into Canvas.	The content begins with a title page, followed by the learning objectives and a video explaining what a bar chart is, covering its components and how to read it. A labeled diagram of a bar graph will be displayed to visually reinforce the concepts introduced in the video.
Overall Description	Content

There will be a pedagogical agent guiding students through the lesson, allowing them to interact by clicking on text box responses to questions and prompts. There will also be back and next buttons.
Navigation

Students will practice by interacting with the agent, who will provide feedback on their responses, indicating whether they are correct or incorrect. Multiple choice responses will be available.
Practice

Students will engage in a drag-and-drop activity to label a bar graph and will be provided immediate feedback on their understanding.
Assessment

Slide 1: Title Page

Narration: Welcome to the lesson on Identifying Components of a Bar Graph. In this module, we will explore what a bar graph is and learn how to recognize its key components. Click next to continue.

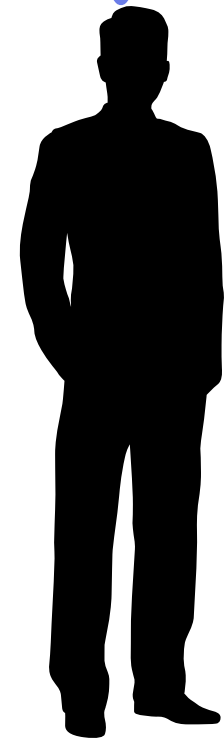

Slide 2: Objectives

Objectives

By the end of this lesson, you should be able to:

- Understand what a bar graph is
- Identify and label key components of a bar graph

Pedagogical Agent

Back Button

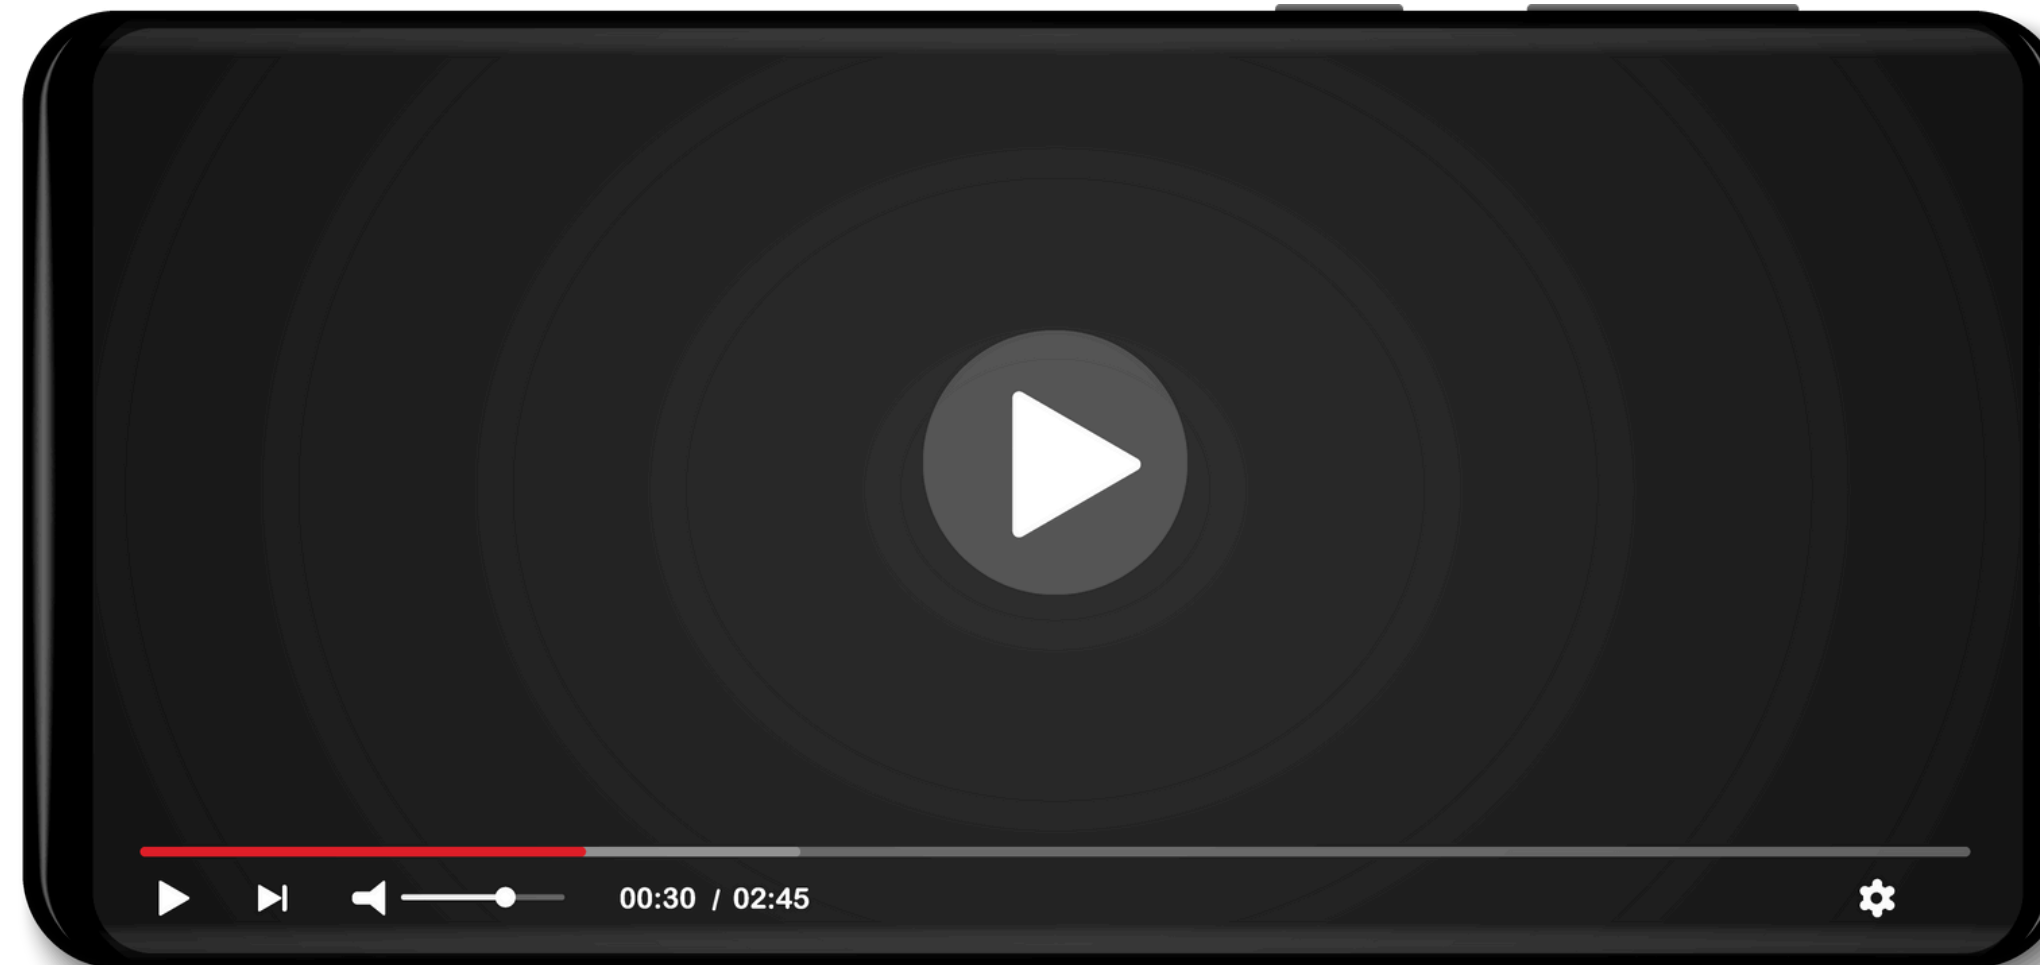

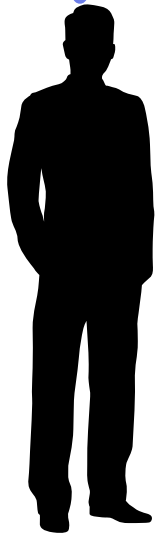

Next Button

Narration: By the end of this lesson, you should be able to understand what a bar graph is and identify and label key components of a bar graph.

Slide 3: Video

What is a Bar Chart

Pedagogical Agent

Back Button

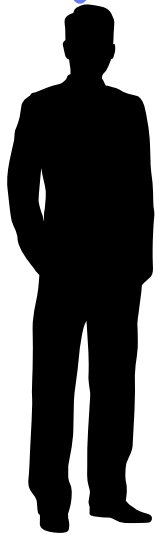

Next Button

Narration: You will now watch a video titled, “*What is a Bar Chart?*”. Click play to watch.

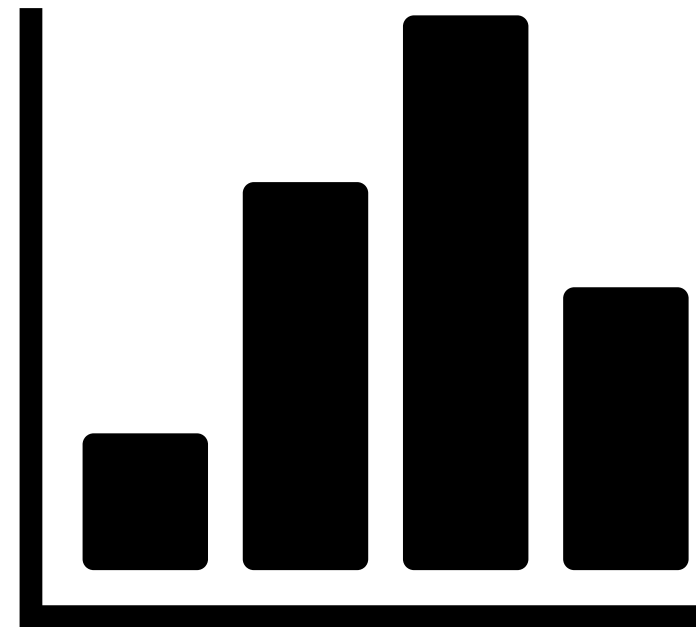

Slide 4: Direct Instruction

How to Label a Bar Chart

Pedagogical Agent

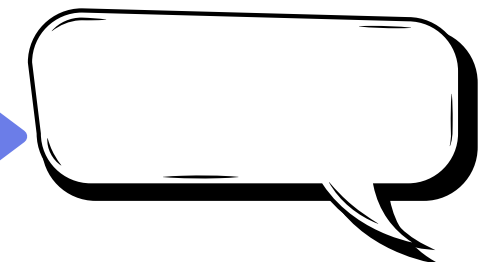

Back Button

In this slide, the pedagogical agent will provide direct instruction on labeling a bar chart, guiding the user through each component and its proper labels. Users can respond to the agent using pre-written text responses.

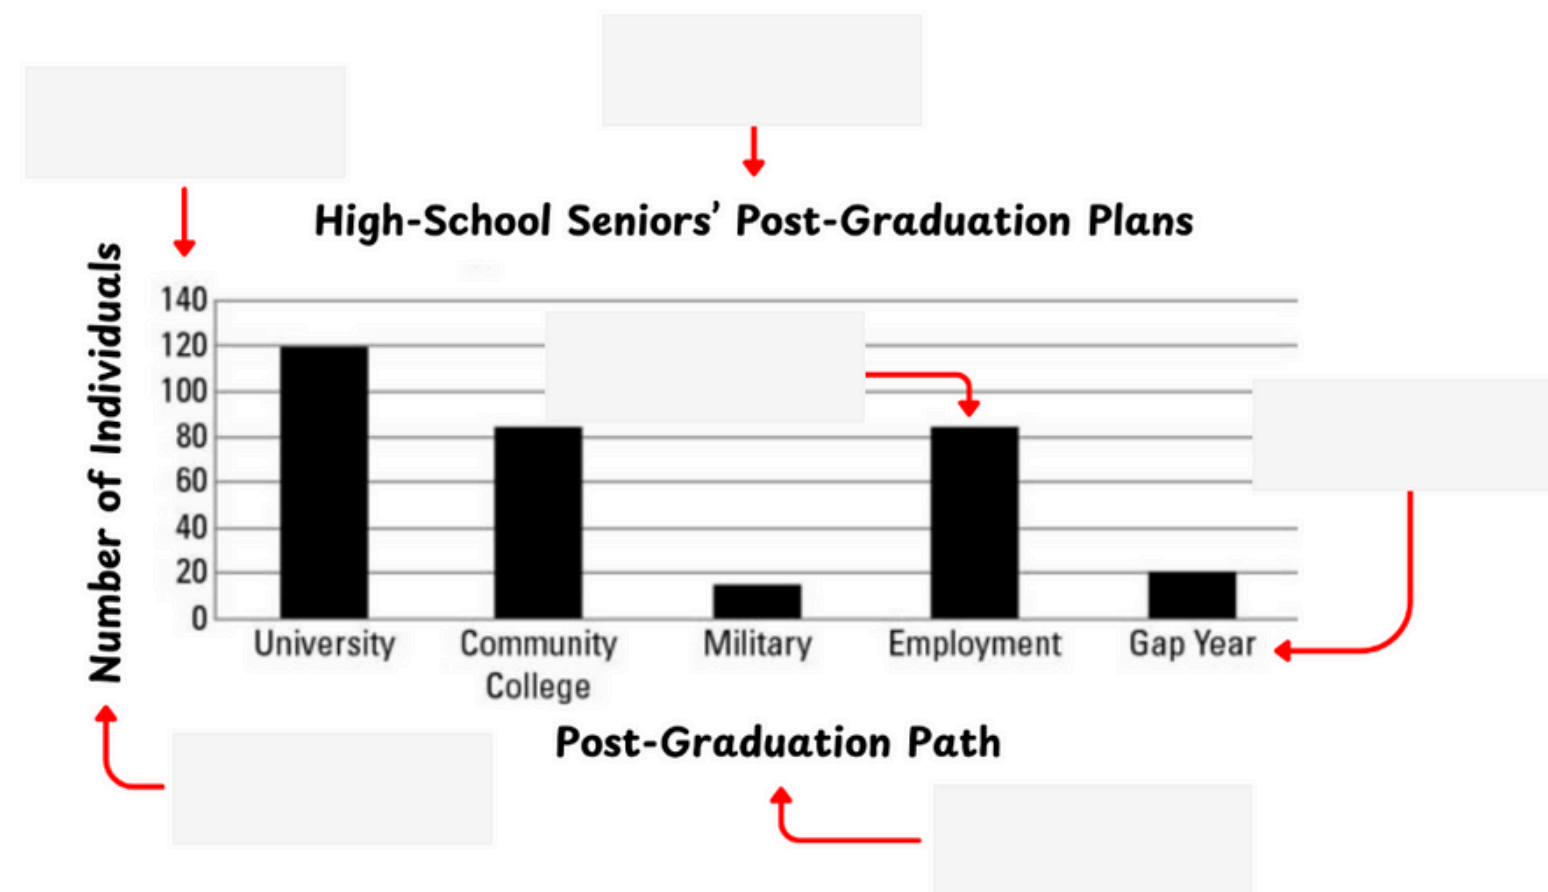

Response Text Box:
Must click to continue

Narration: Now that you have watched the video on bar graphs, let's analyze an example together. This bar graph is an example....

Check Button

Description: Students will put their knowledge to the test with a drag and drop activity.

Slide 6: End of Section 1

Congratulations!

Pedagogical Agent

In this slide, the pedagogical agent will congratulate the user for completing the first section of the module on Identifying Components of a Bar Chart.

The agent will preview the following section on interpreting data from a bar chart and encourage the user to continue when ready.

Back Button

Next Lesson

Narration: Congratulations on completing the first section of the module! In the next section...

Lesson #2

Interpret Data from a Bar Chart

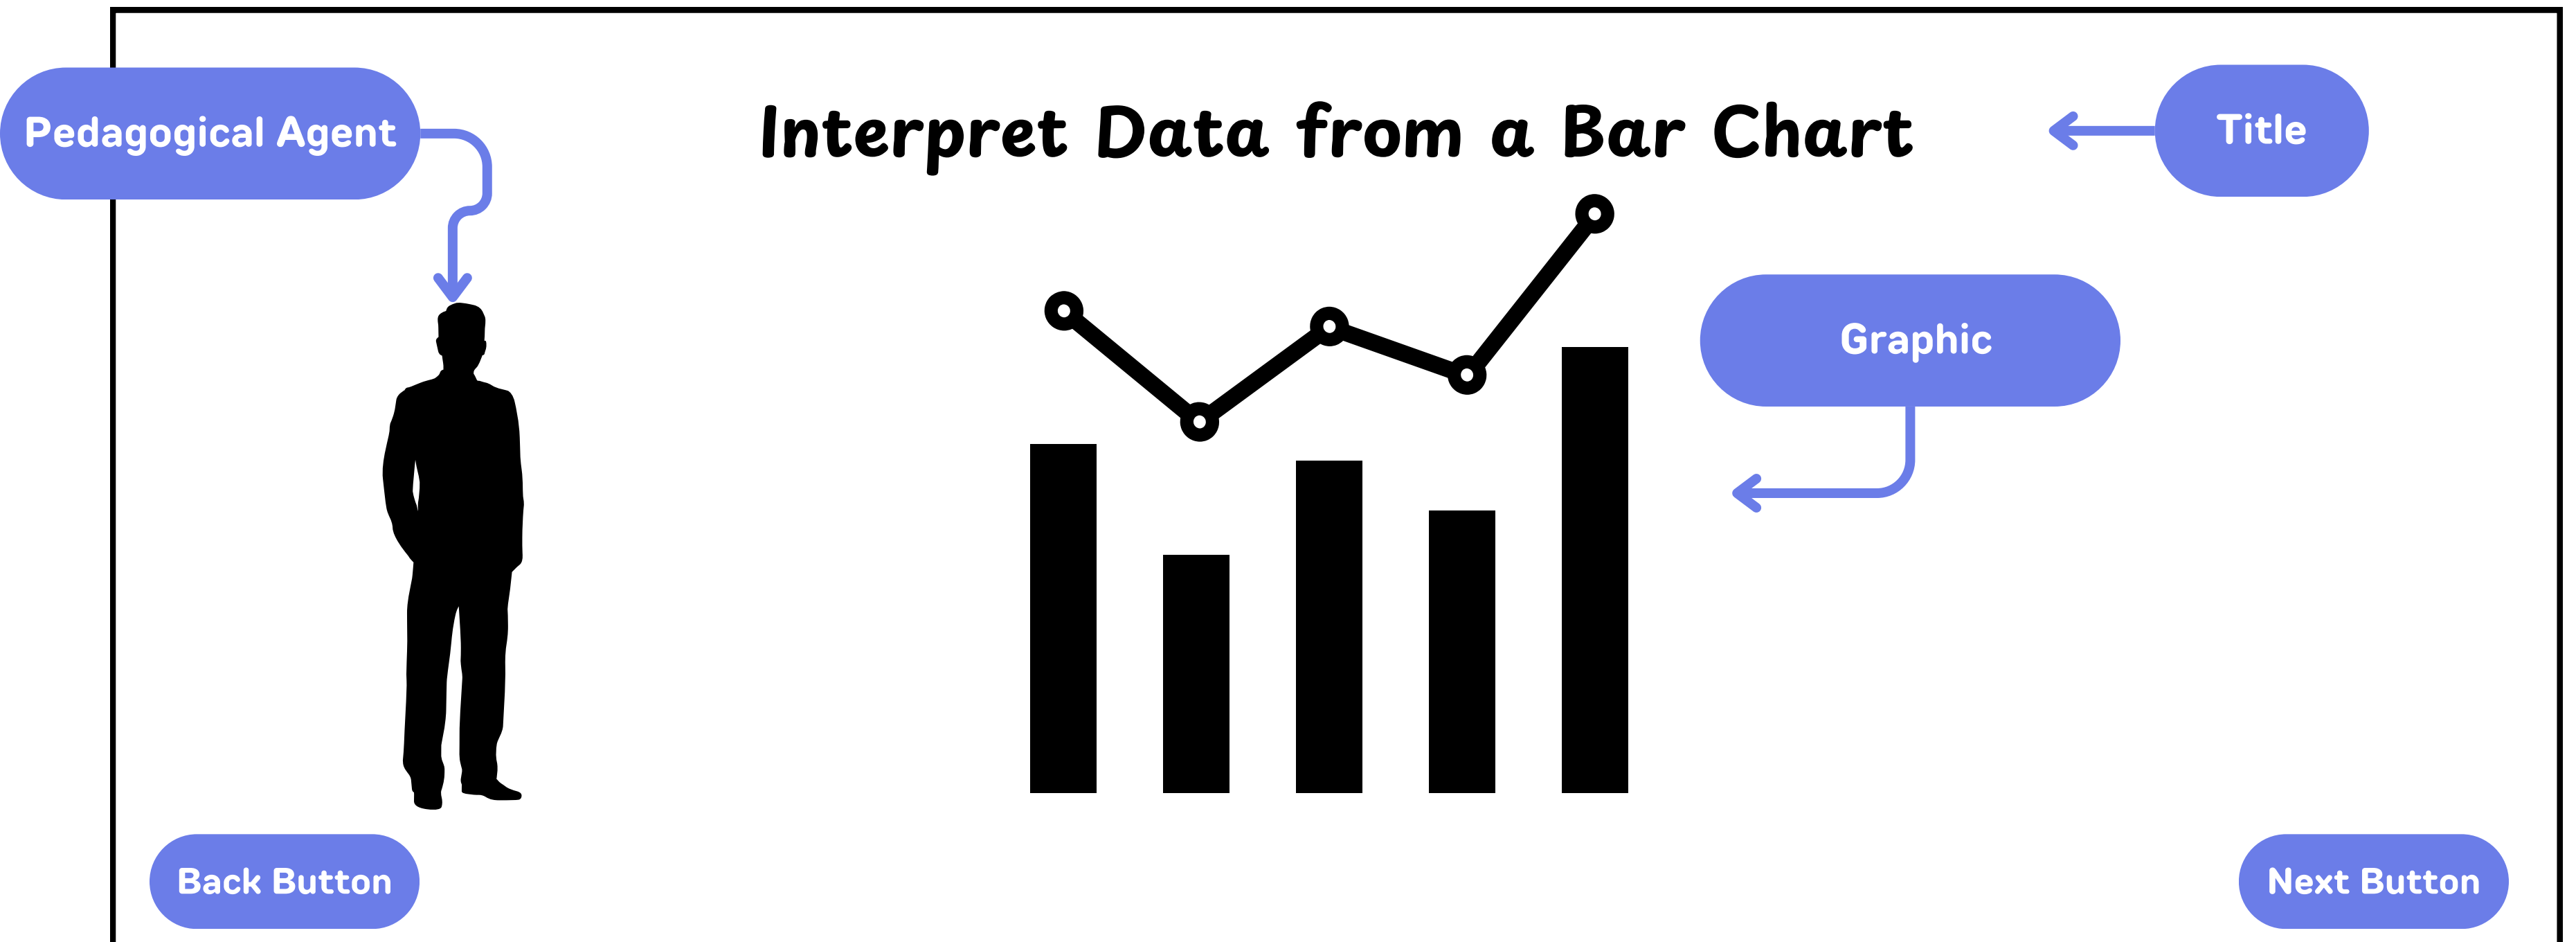

In this lesson, students will be able to interpret the data presented in a bar graph. The lesson will be an H5P SCORM file embedded into Canvas.	The content begins with a title page, followed by the learning objectives. A direct lesson from the pedagogical agent will explain how to interpret data from a bar graph.
Overall Description	Content

A pedagogical agent will guide students through the lesson, allowing them to interact by clicking on text box responses to questions and prompts. Navigation will include back and next buttons.
Navigation

Students will practice by interacting with the agent, who will provide feedback on their responses. Multiple-choice responses will test their knowledge in various sections.
Practice

A short quiz will follow the lesson to assess students' ability to interpret data from a bar graph, ensuring they have grasped the key concepts.
Assessment

Slide 1: Title Page

Narration: Welcome! In this section, we will cover how to interpret data from a bar chart. Click next to continue.

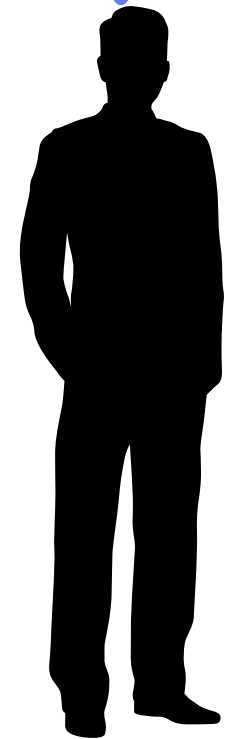

Slide 2: Objectives

Objectives

By the end of this section, you should be able to:

- Interpret the data represented in a bar graph

Pedagogical Agent

Next Button

Narration: By the end of this lesson, you should be able to interpret the data represented in a bar graph.

Slide 3: Direct Instruction

Interpreting Data from a Bar Chart

Pedagogical Agent

In this slide, the pedagogical agent will provide direct instruction on interpreting data from a bar graph. The pedagogical agent will guide students through the lesson, allowing them to interact by clicking on text box responses to questions and prompts.

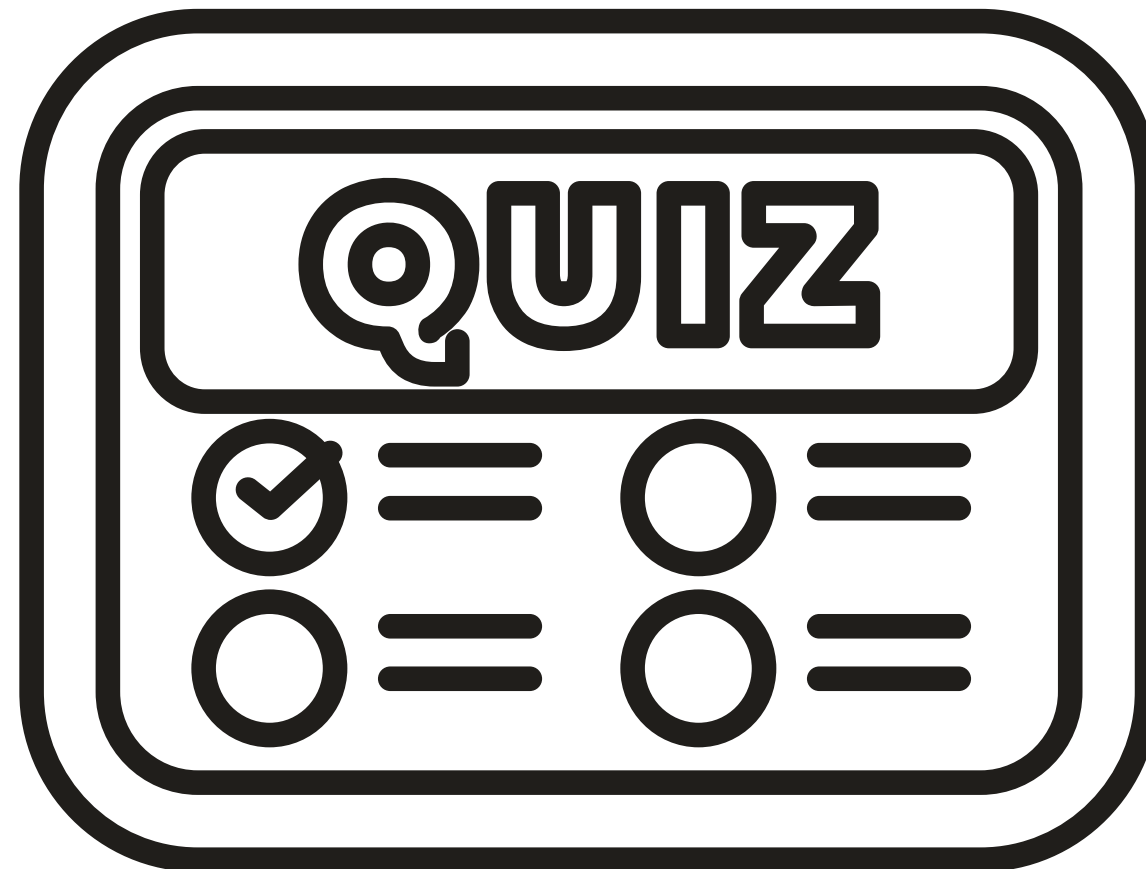

Back Button

Response Text
Box Choices

Narration: As we go through this lesson together, I'll show you how to interpret the data from a bar graph. You'll also get to interact with me! When you see text boxes, feel free to click on them to answer questions and respond to my prompts. Your input is important, and it will help you practice your skills. Let's dive in and start exploring how to interpret bar graphs!

Slide 4: Multiple Choice Quiz

Knowledge Check

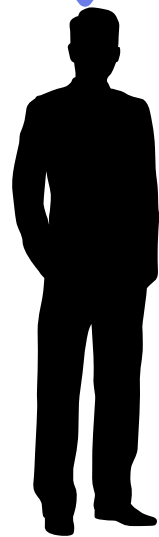

Back Button

Description: This short quiz will assess students' ability to interpret data from a bar graph, ensuring they have grasped the key concepts of the second section.

Slide 5: End of Section 2

Congratulations!

Pedagogical Agent

In this slide, the pedagogical agent will congratulate the user for completing the second section of the module.

The agent will inform the user that they have finished the learning module.

Back Button

End Course

Narration: Congratulations! You've successfully completed the second section of our module on interpreting data from a bar graph.....
